

Big Bang Big God: A Universe Designed for Life? (1st New edition)

By Rodney Dennis Holder

Lion Hudson Plc. Paperback. Book Condition: new. BRAND NEW, Big Bang Big God: A Universe Designed for Life? (1st New edition), Rodney Dennis Holder, In Big Bang, Big God, Rodney Holder argues that only the existence of God can provide an adequate explanation for the existence of the universe, and that design by God provides the best and most rational explanation for its beginning state and the astonishing precision of nature's physical constants - its so called 'fine-tuning'. These features point to a Creator. To explain the present state of the universe, the best current scientific theories require that this fine-tuning must be extremely precise. Dr. Holder examines the evidence that the discoveries of modern cosmology provide for a Creator: How did the universe begin and how has it evolved? Why are the laws of nature so 'fine-tuned' as to produce a universe with intelligent creatures in it such as mankind? Can the existence of a multiverse, a vast or infinite collection of universes, explain the specialness of this universe? Big Bang, Big God is an important and luminous book that will find a place with readers curious about the origins of our world.

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be playful, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
